Projects

VENDIFY; E-COMMERCE & PAYMENT PLATFORM,
Backend API / Web Dashboard / Mobile Application

- Designed and developed the backend API for a full-stack e-commerce platform built for Nigerian merchants.
- Built the backend using **C# and .NET 8**, with **PostgreSQL** and **Entity Framework Core** for data persistence.
- Developed and maintained **60+ REST API endpoints** supporting authentication, merchants, customers, products, inventory, orders, payments, and platform operations.
- Implemented **JWT based authentication and role based authorization** for Admin, Merchant, and Customer users.
- Integrated **Paystack, Flutterwave, and Stripe** to support payment processing for Nigerian and international customers.
- Designed payment-related application workflows to support multiple payment providers through backend integrations.
- Built APIs supporting merchant storefronts, product management, inventory, coupons, analytics, and order management.
- Implemented WhatsApp checkout functionality and support for PWA-based customer experiences.
- Structured the platform as three separate applications: **Backend API, Web Dashboard, and Mobile App**, communicating through the backend API.
- Containerized the backend application using **Docker**.
- Deployed the backend API to **Render** and the web application to **Vercel**.
- Worked with third party services including **Cloudinary** for media management and external payment providers for transaction processing.
- Applied version control and collaborative development practices using Git and GitHub.

STUDENT PROGRESS TRACKING SYSTE, *ASP.NET Core MVC / C# / PostgreSQL / Entity Framework Core / ASP.NET Identity*

- Built and deployed a full-stack learning management and student progress tracking system.
- Implemented role-based access for **Admin, Mentor, and Student** users.

- Developed dashboards, quizzes, attendance tracking, and certificate generation.
- Designed and managed relational data using PostgreSQL and Entity Framework Core.
- Implemented authentication and authorization using ASP.NET Identity.
- Developed application workflows for managing user access and student-related data.
- Deployed the application to a live environment.

AI-POWERED PDF EDITOR,

ASP.NET Core MVC / C# / SQLite

- Developed a web-based PDF editing application using ASP.NET Core MVC.
- Implemented document editing functionality including text editing, redaction, and annotations.
- Integrated AI-powered natural language commands into document editing workflows.
- Implemented document version control and recovery functionality.
- Developed backend logic for complex PDF processing operations.
- Used SQLite for application data persistence.
